To Whom It May Concern:

Re: Waste Electrical and Electronic Equipment Directive (WEEE), Directive 2002/96/EC

The Waste Electrical and Electronic Equipment Directive (WEEE Directive) is the European Community Directive 2002/96/EC on waste electrical and electronic equipment which, together with the Restriction of Hazardous Substances (RoHS) Directive 2002/95/EC, became European Law in February 2003. This directive sets collection, recycling and recovery targets for all types of electrical goods.

The WEEE Directive requires that only the producers of final products complete a WEEE registration. Alpha Wire is a component manufacturer, not a manufacturer of final products. Due to this, Alpha Wire does not require a WEEE registration to place our products on the European Union market.

Product users are responsible for determining the applicability of legislation and regulations based on their individual usage of the product.
